

# Testing for maximizing value and minimizing costs

Nadia Cavalleri

# About me

**PRODUCE VIDEOS**

**WRITE ARTICLES AND BOOKS**

**GIVE CONFERENCES**

**ACTIVELY PARTICIPATE IN THE TESTING COMMUNITY**

## **GRADUATED**

Systems Engineer  
Psychologist

## **+17 YEARS OF EXPERIENCE**

Testing and Quality

## **CERTIFIED**

IBM Rational Functional Tester  
Fundamentals Software testing  
Scrum Foundations

## **RECOGNIZED**

As digital leader by Globant  
One of the most influential women in testing by Abstracta  
Global Excellence Awards Finalist by ISTQB

# Defining testing

- Take care user requirements
- Propose improvements
- Ask the right questions
- Provide objectivity and constructive feedback
- Get into paths that no one else has explored before
- Gain confidence in the software
- Help to mitigate risks

# Demystifying testing

- Testing is a boring and monotonous task
- Testing is only done at the end of the project
- Only testers perform testing
- Too much time is wasted for documenting tests
- I prefer to hire a senior developer who delivers a quality product rather than hiring a tester
- Testing is an unnecessary expense

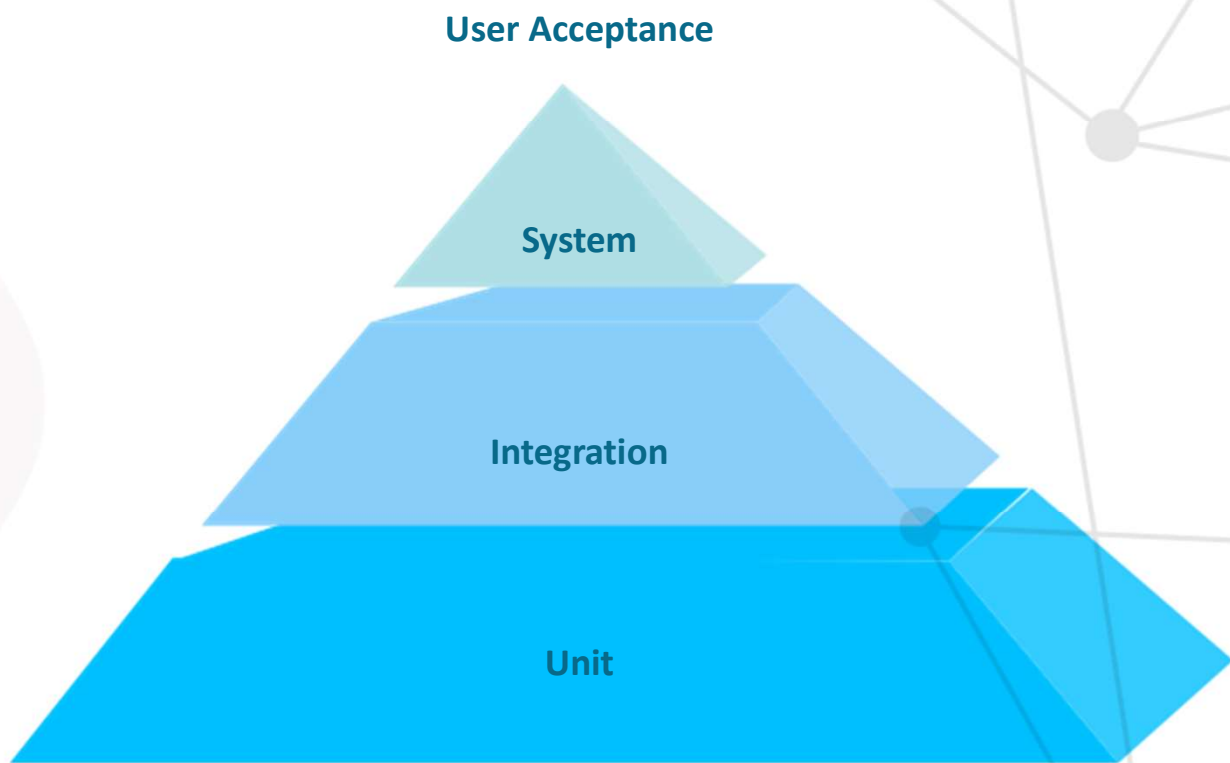

# TYPES OF TESTING

# Functional and non functional

- Portability
- Location
- Compatibility
- Performance
- Security
- Usability
- Accessibility

# Test levels

# Other types of tests

- Exploratory
- Regression
- Automated
- Static

# TEST PRACTICES

# Practices that help us save money

- Shift left testing
- Shift right testing
- Pairwise testing
- Risk based testing
- Agile practices (BDD, ATDD...)
- Continuous integration
- Test automation
- Virtualized environments
- Effective test data management
- Tools
- Configuration management
- Artificial intelligence

# TESTING BENEFITS

# The 10 most important benefits

1. Early detection of errors
2. Improved software quality
3. Risk reduction
4. Cost savings
5. Compliance with requirements and standards
6. Improve user experience
7. Facilitates software maintenance and evolution
8. Improved company image
9. Accelerated development cycle
10. Increased customer confidence

# Learning from Mistakes: Real-Life Examples

# CONCLUSIONS

# Thank you!
